

Restoring God's Earth: A Year of Personal Action

*The earth is the LORD's, and all that is in it;
the world and all who dwell therein. (Ps. 24)*

COMPOSTING

October 1 - October 31, 2017

Decaying food (process minus oxygen) in landfills produces methane—a powerful greenhouse gas, 84 times more damaging than carbon dioxide. Solution? Compost that food! Composting adds in oxygen to the process and produces nutrient rich soil. Compost added to gardens retains water, produces healthier plants and can even pull carbon dioxide out of the air (a process called carbon sequestration)!
It's Earth's finest form of recycling.

Let's ACT together this year to restore the fullness of God's earth.
